Maryland Inventory of Historic Properties Form

PG: 87A-41
Inventory No. 87A-17

1. Name of Property (indicate preferred name)

historic Anchovie Hills Site Tobacco Barn
other Zoeter Tobacco Barn

2. Location

street and number 18105 – 18106 Croom Road not for publication
city, town Brandywine vicinity
county Prince George's

3. Owner of Property (give names and mailing addresses of all owners)

name Mary L. & Garrick A. & Mark A. Zoeter
street and number 523 N. Paxron Street telephone
city, town Alexandria state VA zip code 22304-2733

4. Location of Legal Description

courthouse, registry of deeds, etc. liber 5192 folio 307
city, town tax map 174E2 tax parcel 9 tax ID number

5. Primary Location of Additional Data

- ☐ Contributing Resource in National Register District
☐ Contributing Resource in Local Historic District
☐ Determined Eligible for the National Register/Maryland Register
☐ Determined Ineligible for the National Register/Maryland Register
☐ Recorded by HABS/HAER
☐ Historic Structure Report or Research Report at MHT
☐ Other:

7. Description

Inventory No. 87A-17

Condition

<input type="checkbox"/> excellent	<input checked="" type="checkbox"/> deteriorated
<input type="checkbox"/> good	<input type="checkbox"/> ruins
<input type="checkbox"/> fair	<input type="checkbox"/> altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Built circa 1945, this barn is no longer in use and is deteriorating quickly. Sited on the east side of Croom Road in an overgrown field near mature trees, this barn was not easily accessible for survey.

The wood frame structural system is clad in vertical boards and topped with a gambrel roof clad with sheets of standing-seam metal. Much of the standing seam-metal and many of the vertical boards have fallen off the barn. Double-leaf wood vertical board doors are positioned in the north and south elevations. These doors have been cut through the original hinged vertical air doors that would have been opened and closed on these elevations to control air circulation within the barn and so appear to be a later addition to the barn and indicative of a different use of the building.

Access to this barn was not provided. Tobacco is no longer cultivated on the land associated with this barn.

Figure 87A-41 also
known as 87A-17

8. Significance

Inventory No. 87A-17

Period	Areas of Significance	Check and justify below			
<input type="checkbox"/> 1600-1699	<input checked="" type="checkbox"/> agriculture	<input type="checkbox"/> economics	<input type="checkbox"/> health/medicine	<input type="checkbox"/> performing arts	
<input type="checkbox"/> 1700-1799	<input type="checkbox"/> archeology	<input type="checkbox"/> education	<input type="checkbox"/> industry	<input type="checkbox"/> philosophy	
<input type="checkbox"/> 1800-1899	<input type="checkbox"/> architecture	<input type="checkbox"/> engineering	<input type="checkbox"/> invention	<input type="checkbox"/> politics/government

	<input type="checkbox"/> conservation	<input type="checkbox"/> settlement	<input type="checkbox"/> military	<input type="checkbox"/> other: _____	

Specific dates c.1945 Architect/Builder Unknown

Construction dates c.1945

Evaluation for:

☐ National Register

☐ Maryland Register

☐ not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

During the more than two centuries in which tobacco served as the money crop in Prince George's County, planters, indentured servants, slaves, and farmers developed utilitarian structures for tobacco curing and packing that have remained essentially the same to the present day. Early barns were square in plan and constructed of notched logs with open spaces between the logs to permit the circulation of air (a log dwelling had chinking and caulking between the logs to prevent the infiltration of air). Inside, scaffolding held the tobacco sticks with the leaves suspended from them in such a way as to allow air to flow over the drying tobacco to prevent mold. Farmers employing the fire-curing method lit small fires on the barn's earthen floor to lower the relative humidity (Percy 1979:33). The Prince George's County barns differed from those constructed in Virginia and North Carolina for the flue curing of bright-leaf tobacco, which employed a stove or firebox with a flue and require a different type of barn—one that was essentially airtight to hold the heat. By the 19th century, the increasing availability of sawn lumber enabled southern Maryland's farmers to construct timber-frame tobacco barns covered with wooden siding, usually vertical board siding. Southern Maryland's air cured tobacco utilized barns constructed with air doors along the sides that could be opened to facilitate the circulation of air. These air doors were three or four vertical boards fastened together and usually hinged that could be opened.

The earliest tobacco barns identified in the survey along Croom Road are the ca. 1820 Duvall Tobacco Barn (87A-31) and the 1800-1830 Watson Tobacco Barn (87A-55) and the most recent barns date to the middle of the twentieth century such as the Stielper (87A-48), Jackson (87A-47), and Chase (87A-44) tobacco barns. Although the dates of construction for the surveyed barns range over one hundred and thirty years, the construction materials, methods of construction, and form of the tobacco barn changed very little. All of the barns surveyed are wood-frame and clad in vertical boards; all of the barns contain four-foot by four-foot rooms to hang the tobacco; and all of the barns have hinged vertical board air doors to control the circulation of air within the barns. The changes in form are very minor but provide the most insight into the date of construction. Early nineteenth century barns have steeply pitched gable roofs. From about 1830 until 1900 the barns have more standardized gable roofs, sometimes with one side of the gable extended to create a shed roof over a stripping room. Around 1900, the use of tractors increased in Prince George's County and central double-leaf doors opening onto a wide central passage began to appear in the barn. The final form change was the advent of the gambrel roof, which created more space within the barn to hang tobacco. Gambrel roofs begin to appear in the 1930s and 1940s.

This barn is an example of a circa 1945 tobacco barn in Prince George's County, Maryland and fits into the last period of tobacco barn construction. The hinged vertical air doors on the north and south elevations indicate this was originally built as a tobacco barn. However the large doors cut through these hinged boards appear to indicate the use of this barn was changed at some point in its history.
